First Aid Certificate (HLTAID010) and (HLTAID009)
2022
RSA (SITHFAB021)
2023
WWCC - Employer
Expiry: 11/12/2028
IC281 Machining course
Chisholm
July 2025
Awards
VCE Top Designs Award recipient
VCAA
2022
VCE Systems Engineering Premiers Award
VCAA
2022
VCE study score of 50 (perfect score) in Systems Engineering
VCAA
2022
Mannix Academic Excellence awards (HD average)
Mannix College
2024 Semester 1
Monash ENG1012 EWB Best Design Award
Monash University
2023

Summary

I am an ambitious mechatronics engineering student at Monash University with a strong passion for robotics, space exploration, and developing cutting-edge ideas. Through my experience as Science Lead at Monash Nova Rover, I have built strong technical skills in CAD, prototyping, system integration, and designing mechanical systems as part of complex engineering projects.

I have also gained valuable experience in documentation, leading effective meetings, running project design reviews, and collaborating with teams across different disciplines. This role has strengthened my ability to communicate clearly, meet deadlines, maintain high-quality documentation, share knowledge effectively, and teach others within a larger team environment.

I thrive on learning quickly, working collaboratively, and tackling challenging design problems. I am eager to learn from Lunar Outpost Oceania's world-class team while contributing creativity, leadership, and technical expertise to pioneering advances in lunar mobility and space robotics.

Education

Monash University February 2023 - Current
Mechatronics Engineering - Accelerated Masters University
WAM: 80.655 (GPA: 3.632) (HD average)
Ballarat Grammar 2010 - 2022
ATAR: 98.15 School

Experience

Monash Nova Rover July 2024 - Current
Senior Mechatronics Engineer - Science Lead Monash
novarover

- 2025 URC Science Payload – Designed and led development of a dual-auger system capable of drilling below 10 cm, extracting regolith, and analysing samples via spectrometry to assess potential biosignatures.
- 2025 ARCh Science Payload – Developed and integrated a kiln-condenser system to extract liquid water from icy regolith and evaluate ilmenite content for in-situ resource utilisation.
- Leadership & Teamwork – Organised meetings, coordinated subteams, and managed cross-disciplinary integration to achieve project milestones.
- Communication – Delivered clear technical updates, maintained strong documentation, and promoted knowledge-sharing and mentorship within the team.

Starfire Snowboards November 2024 - August 2025
Internship Melbourne
starfiresnowboards

- Chassis & Frame Design – Designed and refined the chassis and frame for new electric snowboard prototypes.
- Customer-Centred Design – Embedded rider experience and usability into every design decision, ensuring user aligned performance.
- Innovation & Prototyping – Played a key role in concept generation and development of the next-generation prototype.

Experience

Private Tutoring January 2022 - Current
Year 10-12 Systems Engineering, Physics and Maths Melbourne

- **Communication** - Explaining complex concepts in simple, easy to understand ways. Always relating concepts to real-world applications.
- **Personalization** – Customizing the way content is taught for each individual student

Plinius Engineering (Work Experience) November 2021
Welding, grinding, plasma cutting, crane operation, CAD Ballarat

[plinius](#)

- **Attention to detail** – Following detailed instructions to fabricate structural steel frames

My Ride Bike shop November 2022 - February 2023
CSO Ballarat

[myride](#)

- Basic bike services/construction
- Customer service
- Money Handling

Mitchell Harris Wine Bar January 2021 - January 2023
Kitchen assistant Ballarat

[mitchellharris](#)

- Dishwashing
- Food preparation
- Fast paced environment

Sovereign Hill January 2023 - November 2024
CSO Ballarat
